Business Impact Analysis and Contingency Planning

Webinar #100417-NE

DATE AND TIME

October 4, 2017

1:30 - 3:00 p.m. CT

OVERVIEW

What happens when a computer or the Internet or your phone system are not working? Does each department know what its critical functions are and how to continue working? Is your EMR really the first system that must be restored?

OBJECTIVES

- Understand the importance of a business impact analysis in identifying critical systems/devices/infrastructure.
- Use the analysis to develop plans that will sustain critical functions that will support the organization until systems are recovered.
- Learn how to prioritize system recoveries.
- Identify the relationship between Recovery Time Objectives (RTOs) and the cost of disaster recovery options.

TARGET AUDIENCE

CEOs, CFOs and IT directors.

FACULTY

Denise Mainquist, CISA, CPHIT, CPHIMS, PCIP, MLT

Managing Director

ITPAC Consulting, LLC

Denise Mainquist has over 12 years of experience in information technology-related quality, standards and controls management. She is a Certified Information Systems Auditor (CISA), Certified Professional in Health Information Technology (CPHIT), a Certified Professional in Healthcare Information and Management Systems (CPHIMS), Payment Card Industry Professional (PCIP) and has experience defining and auditing IT controls, computer validation, software testing and has managed implementations of policies, procedures and systems, document management/retention and ISO 9001 quality management systems. Ms. Mainquist was a Payment Card Industry Qualified Security Assessor (QSA) from 2007-2012. Her industry experience is primarily in the private sector and has included work in commercial retail/wholesale, manufacturing, renewable energy, health care, security monitoring services, insurance, banking and 16 years in the pharmaceutical industry. She is also an insurance company examiner.
