Environmental Infection Prevention: Saving Lives and Saving Money

Webinar #052317-MA

DATE AND TIME

May 23, 2017
12:00 - 1:30 p.m. CT

OVERVIEW

As the healthcare industry transforms itself to deal with the unprecedented changes in the marketplace, hospitals are facing increasing challenges to balance patient satisfaction with cost containment. This challenge is compounded by the growing challenge of drug-resistant hospital-acquired infections (HAIs).

Approximately 1 out of 25 patients will acquire a potentially life-threatening HAI during their hospital stay. Multiple factors contribute to this increasingly pertinent issue. Inadequate tools to address risks on-site, lack of employee engagement in the prevention process, cuts in staffing related to HAI prevention and low compliance in relevant processes including hand hygiene all play a role in this costly and dangerous issue. Innovations in infection prevention can help hospitals take meaningful steps to prevent the spread of disease. We'll cover research-based best practices to guide implementation of tailored infection control programs that enhance patient experience and reduce your risk.

TARGET AUDIENCE

This session is recommended for all healthcare personnel.

OBJECTIVES

1. Understand how environment ties to healthcare-associated infections.
2. New research on how pathogens spread and create risk.
3. Understand industry innovation to ensure that your hospital is not just "visually clean", but that it is biologically clean as well.

FACULTY

John LaRochelle, Senior Director, Head of Innovation
Sodexo North America

John LaRochelle+ brings over 30 years of environmental infection prevention, facilities management and safety experience in hospitals, long-term care, corporate and education establishments with direct management experience in environmental infection prevention, maintenance, biomedical engineering, construction, housekeeping, laundry and safety.

He is responsible for program development and technical support of 600 health care locations within the U.S. and is the technical leader for Sodexo's global environmental infection prevention and cleaning program development across all business segments within 80 countries

PRICE

\$195 per connection for members.
\$390 per connection for non-members.

Note: The fee is for one phone line with unlimited participants. For example, 10 employees can participate for only \$19.50 ea!
